

George Nevitt | One of the thousands of people in North Pinellas and West Pasco Counties who choose Helen Ellis.

I live in East Lake, but for my heart my hospital is Helen Ellis.

A World War II veteran who now lives in the East Lake area, George Nevitt has been treated at some of the nation's most famous hospitals, including Walter Reed and the Mayo Clinic. Last year, when congestive heart failure made it hard for him to breathe, he went to Helen Ellis Memorial Hospital – and he describes his care as on a par with any he's ever received.

As your community hospital, Helen Ellis provides a wide range of health care

services, from cardiovascular care to emergency treatment, with the personal attention you deserve. Through the strength of our partnership with University Community Hospital, you now have access to even more health services in more medical specialty and subspecialty areas. So if you need a doctor, or health care information, call our free physician referral service at 943-3600. Because Helen Ellis is where you go to get the care you need.
